Naturally You

Illuminate your look with
REDENSITY 1

What's your skin telling you?

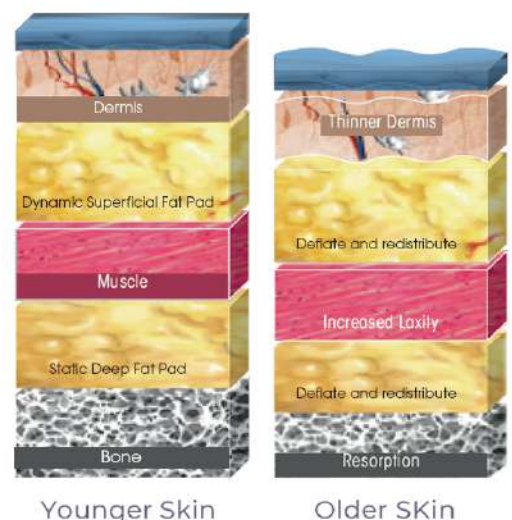

Skin quality, radiance and texture influence the perception of age and your general state of health. It plays an important role on how you feel and how you are perceived.

The skin undergoes natural physiological changes over time, including slow and irreversible alterations due to **intrinsic factors** such as oxidative stress, ethnicity and hormonal changes.

Skin is also impacted by **extrinsic factors** such as sun exposure, air pollution, stress and lifestyle choices. They lead to premature skin ageing and tend to **aggravate its visible signs**.

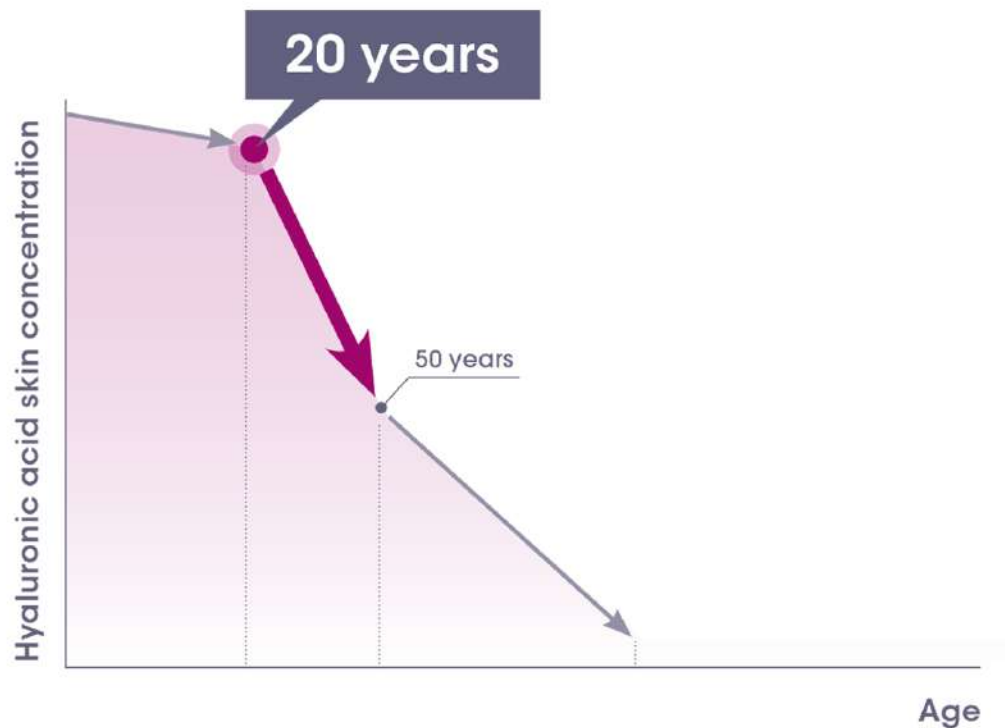

Throughout your life, your skin suffers the consequences of aging such as fine lines, dryness and laxity.^{1,2}

CONSEQUENCES OF AGEING ON EACH LAYER^{1,10-12}

- Skin can get thinner, less firm, less hydrated, less elastic¹
- Fat pad deflation & redistribution²
- Hypertonia of some facial muscles. Sarcopenia³
- Fat pad deflation²
- Bone resorption (e.g. loss of bone support)²⁻⁴

Natural hyaluronic acid in our skin starts to **decrease by the mid-20s.**

Clinical signs of
reduced hyaluronic acid
levels include:

Diminished natural skin
moisturizing capacity

Appearance of fine lines
and wrinkles

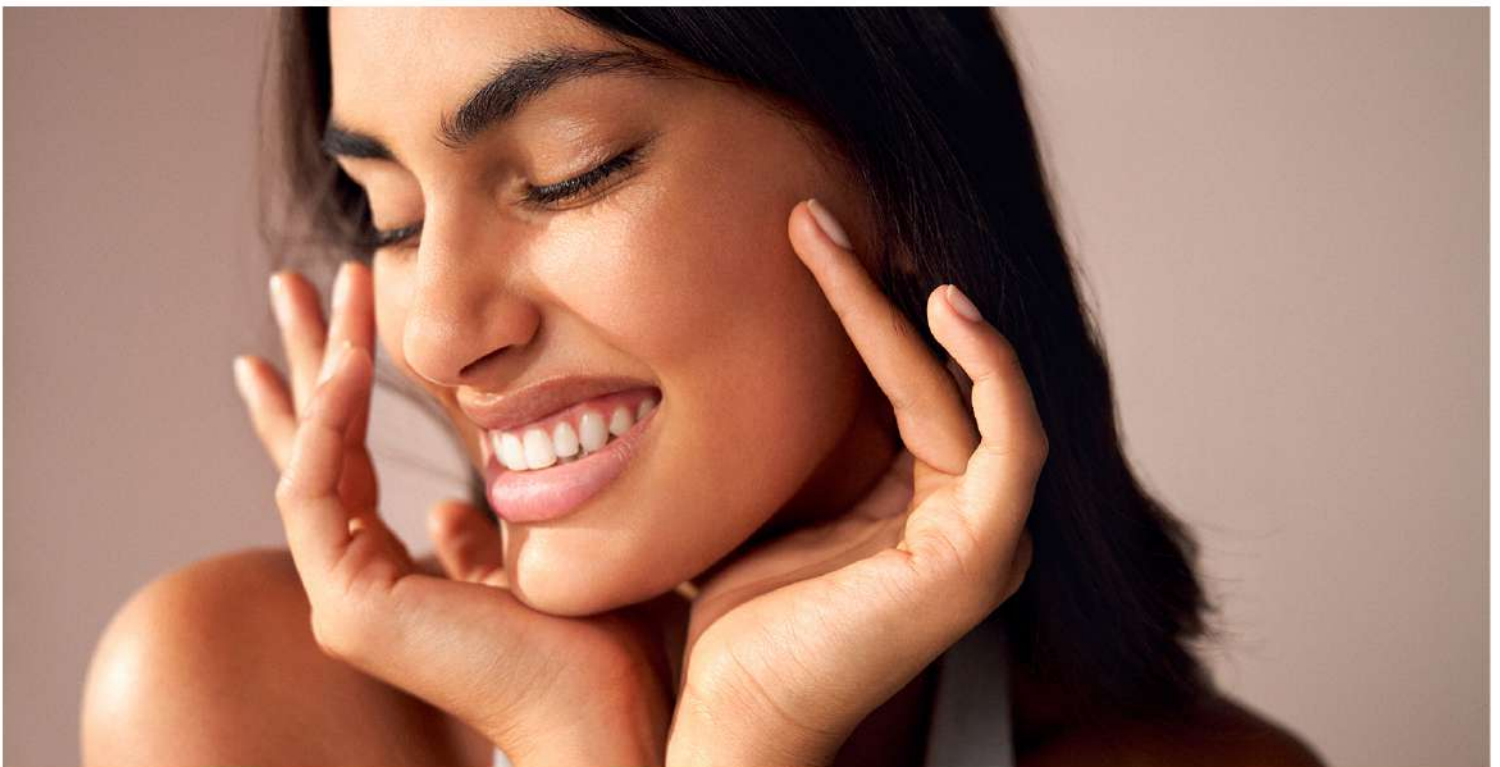

About **Beauty Booster Treatment?**

1. What is Hyaluronic Acid?

In our skin, Hyaluronic acid (HA) is already present in large quantities. It has a significant ability to attract and bind water molecules. HA is important for maintaining structure and volume in the skin.⁹ HA dermal fillers is one of the most popular anti-ageing injectable treatments available to address age-related changes in skin quality and appearance. They have replaced collagen as the ingredient of choice for skin rejuvenation and volume restoration.

2. What happens during the Beauty Booster treatment?

A treatment with Redensity 1 consists of dermal injections over the surface of the whole face, neck and/or décolleté. For optimum comfort throughout the treatment, Redensity 1 contains lidocaine which is a local anaesthetic.

About **Beauty Booster Treatment?**

3. How long does the effect last?

For an optimal result, a treatment plan of 3 sessions at 3-week interval is recommended with lasting results of up to 9 months.⁵ For maintenance, 1 session every 4-6 months thereafter is ideal. However its effects are temporary and depend on several factors (skin type, treated area and injection technique).

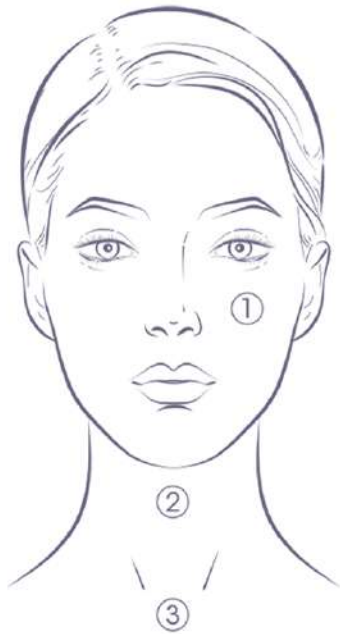

4. What to expect after a dermal filler injection?

Most of the patients notice little or no downtime and can have their treatment done during lunch break for example. However, the side effects that may appear are most often temporary and common.

In case of side effects following treatment with Teoxane injectables, you should immediately contact your injector.

Enhance Your Skin Quality

Revitalizing and redensifying treatments are designed to **protect and prolong your skin's youthfulness.**¹

1. Face - Loss of elasticity, dry, toneless, dull with fine lines and wrinkles

2. Neck - Dry, sagging with horizontal wrinkles

3. Décolleté - Sagging, toneless with dynamic wrinkles.

In one session, **TEOXANE** can help you treat these 3 areas.

Redensity 1, an innovative hyaluronic acid based injectable, that has been developed to improve skin quality.³

Specifically designed to be the **closest to the natural hyaluronic acid** found in your skin, this **beauty booster** treatment provides:

Improvement of hydration, radiance and firmness.⁴

Correction of skin roughness and withered skin, marked by ageing.⁴

Prevention of wrinkle formation.⁴

Redensification action through tissue restructuring (+98% of Collagen^{3**}) and protection from oxidative stress⁴⁻⁵

Teoxane Proven Satisfaction^{6,7}

Nearly 20 years of continuous innovation and trusted millions of injections world wide.

97%

of patients are satisfied by **Redensity1** for **Redensifying and Revitalising Treatment**⁸

Ask your practitioner for your beauty booster treatment to help take care of your skin. Redensity 1 can be used as a standalone treatment or combined with another aesthetic procedure.

Proven Clinical Result & High Patient Satisfaction

CLINICAL RESULT

Superior improvement of **Hydration**

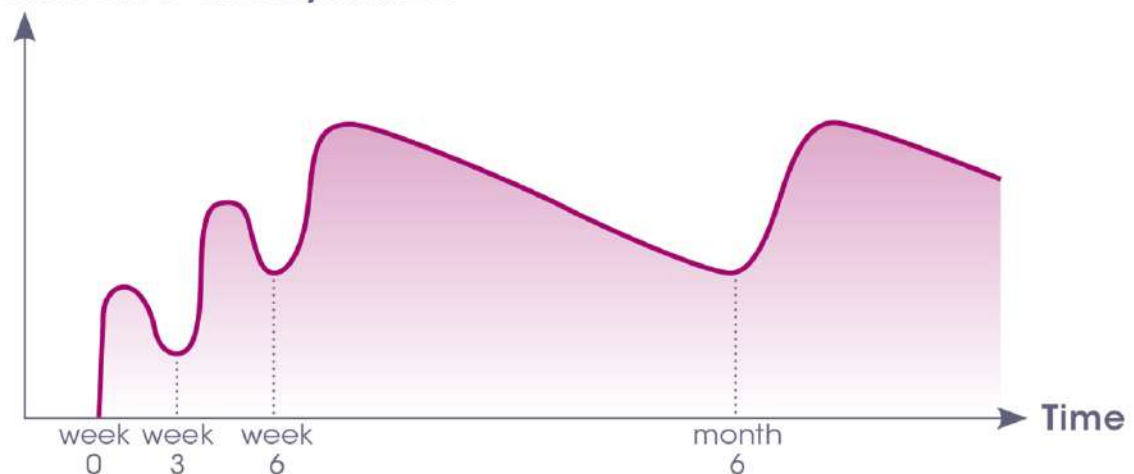

Reduction of **Skin Roughness**

Improvement of **Radiance and skin Quality**

Long - Lasting Results

Skin Glow and Hydration

Intensive skin nourishment and hydration

 3 sessions at 3-week intervals

Maintenance of skin health glow, and density
